Design is our DNA

“THE SIMPLICITY AND THE PURITY OF THE SHAPES ARE SYNONYMOUS OF THE BALANCE BETWEEN FUNCTION AND EMOTION; AN ESSENTIAL BEAUTY...

At the heart of Ideal Standard is a passionate belief in the ‘eternal value of design.’ A belief in its power to change lives for the better. It’s a belief founded on our daily experience, and informed by our long heritage of Italian design. By looking and learning from this heritage, we build on the most outstanding elements of successful collections, and reimagine them for today’s world. By tracing our past and reflecting on the talents of old masters such as Gio Ponti

and Achile Castiglioni, we are able to forge the future. In our collaboration with multi-award winning Palomba Serafini Associati, we work to create a seamless synergy of functional perfection blended with aesthetic beauty, embracing innovations and improving design standards as we navigate the constant changes of modern life. For us, design is vital, craft is essential, experience is everything and quality is second to none.

Ponti Z, an iconic shape of the fifties and sixties. The basin is smooth and without reliefs, is trapezoidal: a shape that follows the movement of the arms when washing.

...THIS IS THE CULTURAL ENVIRONMENT WHERE MY WORK WITH IDEAL STANDARD TAKES PLACE AND IT’S NO COINCIDENCE IT TAKES INSPIRATION FROM THE COMPANY’S OWN ROOTS.”

ROBERTO PALOMBA

Top: The 1965 setting created for Ideal Standard’s Espressioni Room in Milan was designed by the brothers Pier Giacomo and Achille Castiglioni. Bottom: Another image of an exhibition in the Ideal Standard cultural space, active in Milan in the sixties and seventies.

IDEAL-Standard

Milano via Ampère 102

Un tempo si fabbricavano apparecchi igienici con materiale assorbente e poroso, facile ricco di germi. Avete simili apparecchi nel vostro bagno? Ebbene, ricordate: un nemico è in agguato nella vostra casa, potente e invisibile. Sterazzatevi al più presto!

L'Ideal-Standard fabbrica i suoi apparecchi con la Vitreux China, un materiale di struttura omogenea, impermeabile in tutto lo spessore, sul quale lo smalto ha unicamente la funzione di rendere la superficie esterna gradevole alla vista.
