Symphony[®]
SINCE 1971

INSPIRED *by* SIMPLICITY

WELCOME TO LINEAR®

However you see it, Linear® can make it happen. Whatever interior you're working with and whatever mood you're trying to capture, our clean, minimal lines give you the flexibility to think creatively.

Whether you're complementing historic detail or making a sleek, modernist statement, Linear® helps you unshackle your imagination and do something special with every space.

FORM

Linear's minimal aesthetic is driven by simplicity of form.

They're rational. They're functional. They're very beautiful. And their flexibility helps you bring pin-sharp contemporary design to any environment. Inspired by uncluttered modernism, we've created a range of styles that complement anything from a new-build apartment to a refurbished mill. Lines are clean and satisfying. Tones are subtle and muted. Doors and drawers are handle-less. If you want tall, wide, fitted or island units, you'll find our kitchens can flex to fit your imagination.

Seamless integration of the trim provides an effortless handle-less kitchen style.

Linear's signature design features an aperture that allows effortless placement of your fingertips to open and close the kitchen cabinetry, thanks to its well designed ergonomics and combines soft-close functionality for maximum simplicity. There is a choice of trim finishes to complement your overall kitchen design.

Plinths also available to co-ordinate with each trim colour.

TRIM

TEXTURE

When textures work hand-in-hand with colours, you get a thousand nuances of tone and mood.

They throw a spectrum of subtleties into the mix, which you can use to accentuate lines, maximise light or create intriguing contrasts.

Linear® offers a varied range of finishes to help you make the most of these subtleties. You can master the art of sophistication with a variety of matt designs featuring touchable textures across a variety of wood grains and colours. Or you can select from a palette of gloss designs in a spectrum of subtle shades. Whatever you choose, it will retain a soft tone that focuses on the sleek, simplified forms of our kitchens' minimal aesthetic.

Colours don't have to shout to get noticed.

Subtle tones make a statement of their own, exuding an understated confidence that emphasises form and adds a quiet sophistication to a room.

COLOUR

More and more people are seeing the kitchen as the centre of their home. Designers have responded by letting kitchens spill into living areas, creating fluid, multi-purpose environments that maximise space and reduce the need for interior partitions.

Linear's clean, simple lines and flexible units are built for this contemporary world. They let you blur boundaries, adapt to structures and complement existing period detail. You have the freedom to build up, spread out or stand alone. So your imagination is free to roam. Linear's stripped-back designs help you create stylish, adaptable spaces that can act as both a soothing escape and a hub of social activity. They help you think creatively and design clean, clutter-free environments that are the centrepiece of your home.
